

We meet your every need, so you can meet his every need

Controlled substance ordering system

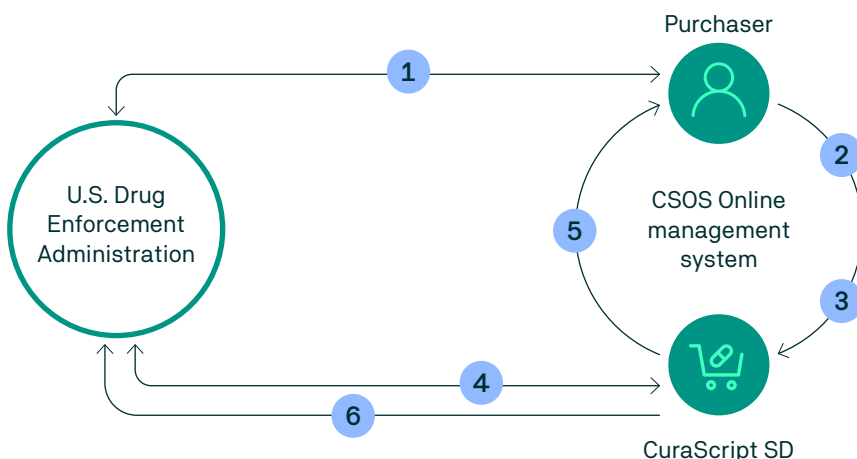

CuraScript SD by Evernorth understands how an unexpected delay in receiving pharmaceutical products can impact your ability to administer patient care. With that in mind, CuraScript SD offers the availability of electronic 222 Schedule II narcotics ordering on curascriptsd.com using the DEA's Controlled Substance Ordering System integration. The benefits are significant and include:

- + Simple, accurate ordering process eliminating line rejections
- + Reduced spend by eliminating mailing costs of traditional 222 forms, as well as Schedule II handling fees waived
- + No line item limit and integrated ordering on curascriptsd.com means you can combine your purchasing tasks into a single transaction
- + Integrated reporting tools to assist with inventory management and logging receipt of shipments
- + Products ship from multiple warehouses without having to submit multiple DEA 222 forms

Important information

To comply with DEA regulations and prevent diversion of controlled substances, CuraScript SD requires a valid DEA license and a complete and correct Intent to Purchase Controlled Substances form on file. In addition, CuraScript SD establishes the authorization status of each person seeking to order a controlled substance and only accepts orders from persons legally authorized to place them.

Contact your CuraScript SD Account Manager or our CSOS Team at csdcsoadmin@curascript.com, to learn more about CSOS Online and how your practice can begin using the CSOS Online technology today!

1 Apply for DEA license

The purchaser enrolls with the DEA (a 4-6 week process). After approval, the purchaser is issued their CSOS certificate, eliminating the need for the paper 222 form.

Note: Paper 222 forms are no longer accepted by CuraScript SD.

2 Onboarding

A CuraScript SD CSOS Online administrator will be available to review the onboarding process.

3 Submit e222 order

The purchaser places an electronic 222 order with CuraScript SD and digitally signs the order using their CSOS Online Certificate.

4 Validation process

CuraScript SD completes CSOS Online Certificate validation in partnership with Axway and the DEA.

5 Fulfillment

CuraScript SD ships the order.

6 Reporting

The transactions of Controlled Substances are reported to the DEA by CuraScript SD.
