

MANAGE BILLING ONLINE & CONVENIENT ORDERING

Did You Know?

CuraScript SD offers easy online management of invoices, payment options, payment history and more

Online Services to Better Serve Physicians

One Login Grants Access to Ordering, Reporting, and Account Management

01 | Search & Ordering

Online Ordering with CuraScript SD is simple with our diverse product catalog and online features:

- View On-Contract Items
- Create and Modify **Order Pads** of Frequently Purchased Items
- View Generic Equivalents
- View Jcode Information

After a customer has added items to their cart, they follow a simple checkout process. Checkout allows them to edit the selected items, add a purchase order number, and view their total. Customers will receive an order confirmation once an order has been successfully submitted.

02 | Manage Billing Online

CuraScript SD's Manage Billing dashboard within the Online Ordering Platform allows physicians to have thorough and easy access to many features and documents. With Manage Billing Online you can:

Manage Payments – Review invoices, pay off balance, make a one-time payment or schedule future payments

Payment Options – Manage, add, and update payment methods

Pending Payments – View, manage, and edit pending payments

Schedule Date Range Payments – Schedule future payments in a specified date range

Billing History – View the complete history of your account's billing activity

Statements – Access and manage month statements

03 | Reporting

With access to the Online Ordering website customers also have the ability to pull reports for their account(s). Within the online Reporting Dashboard, a customer is able to customize filters in their reports to get the exact data they need. Reports can be exported, saved and/or printed for convenience. Detailed charts make analyzing and reading information easy and simple. Reports available online are:

- Utilization
- Contract Utilization
- Controlled Substance
- DSCSA
- ASP
