A More Connected Approach to Neurology

The Role of Specialty Distribution

As the treatment landscape for neurology practices evolves, finding partners who can support your practice's needs is crucial. Specialty distribution supports the delivery of high-cost, complex therapies, ensuring they remain secure while coordinating between the distributor and the practice.

From physician offices to health systems, CuraScript SD by Evernorth works with each medical facility to best support their needs. Support for neurology practices may include

- Access to specialty infusion, injectable, oral and rare disease therapies
- Product availability and ordering support
- Cold-chain and specialized product handling
- And more!

Finding Savings with GPOs

Beyond specialty distribution, finding cost savings while maintaining the value from services and solutions that support your practice. Group purchasing organizations (GPOs) are designed to provide these savings, though many support just one specialty.

Matrix GPO, however, is a multidisciplinary specialty GPO that has the capacity to support providers from a variety of specialties. Through its relationship with CuraScript SD, Matrix GPO can offer eligible members valuable solutions and savings, such as:

- A curated portfolio of specialty drug contracts
- Contract optimization and program-management support
- Rebate assistance, reporting and performance tools

A More Connected Approach

Each brand provides its members access to the products and solutions their practice needs without sacrificing value. CuraScript SD, in partnership with Matrix GPO, offers physicians and medical practices more than just specialty distribution or GPO solutions alone.

Did you know?

CuraScript SD supports the secure, coordinated delivery of high-cost, complex therapies across specialties and medical facilities.
