

Specialty Distribution that Fits Your Needs

The Distribution Difference

Delivering specialty products throughout the U.S., CuraScript SD by Evernorth (CSD) operates 4 distribution centers strategically located across the country, enabling efficient shipping while ensuring quality no matter the destination. Whether your order needs standard or specific refrigerated shipping, CSD is prepared to deliver the products you order quickly and safely. We treat every shipment with exceptional care so each physician and practice we serve can focus on caring for their community.

Specialty distribution is vital to every specialty. Ensuring your patients receive the medication safely and when they need it is one key part. The other is providing access to those medications.

Access to Essential Therapies

Access to the biosimilars, generics, gene therapies, and other biopharmaceuticals and pharmaceuticals your patients need goes hand in hand with the expert care we provide. With the wide range of specialties we serve, we give physicians and medical facilities access to a diverse

product portfolio, including 40 products exclusive* to CSD.

Rare Disease Efforts

Timely delivery of medications is important for any patient. Rare disease patients especially rely on this timely delivery for their health and well-being. Based at one of our centralized distribution centers, our Rare Disease Team works to ensure every rare disease patient receives critical medication when they need it. CSD provides physicians who care for these patients with solutions that ensure safe, expedited shipping of the rare and orphan specialty pharmaceuticals they order.

Meeting Your Needs

At every touchpoint along your journey, our teams are dedicated to providing the specialized care you need to focus on your patients. From inventory management to product solutions, CSD offers more than just specialty distribution. We strive to provide access to the services your practice needs so your attention can remain with your patients.
